If this presentation has been received in error, it must be returned immediately to Metinvest B.V. (the "Company").

This presentation does not constitute or form part of any advertisement of securities, any offer or invitation to sell or issue or any solicitation of any offer to purchase or subscribe for, any securities of the Company or any of its subsidiaries in any jurisdiction, nor shall it or any part of it nor the fact of its presentation or distribution form the basis of, or be relied on in connection with, any contract or investment decision.

This presentation is not directed to, or intended for distribution to or use by, any person or entity that is a citizen or resident of, or located in, any locality, state, country or other jurisdiction where such distribution or use would be contrary to law or regulation or which would require any registration or licensing within such jurisdiction.

This presentation is not an offer of securities for sale in the United States. The Company's securities may not be offered or sold in the United States except pursuant to an exemption from, or transaction not subject to, the registration requirements of the United States Securities Act of 1933, as amended.

This presentation is directed solely at persons outside the United Kingdom, or within the United Kingdom, to (i) persons with professional experience in matters relating to investments falling within Article 19(5) of the Financial Services and Markets Act 2000 (Financial Promotion) Order 2005 as amended (the "Order"), (ii) high net worth entities, and other persons to whom it may lawfully be communicated, falling within Article 49(2)(a) to (d) of the Order and (iii) persons to whom an invitation or inducement to engage in investment activity (within the meaning of section 21 of the Financial Services and Markets Act 2000) in connection with the issue or sale of any securities of the Company or any member of its group may otherwise lawfully be communicated or caused to be communicated (all such persons above being "relevant persons"). Any investment activity to which this presentation relates will only be available to and will only be engaged with relevant persons. Any person who is not a relevant person should not act or rely on this presentation.

No representation, warranty or undertaking, express or implied, is made as to, and no reliance should be placed on, the fairness, accuracy, completeness or correctness of the information or the opinions contained herein and no reliance should be placed on such information. None of the Company or any of its affiliates, advisors or representatives shall have any liability whatsoever (in negligence or otherwise) for any loss howsoever arising from any use of this presentation or its contents or otherwise arising in connection with the presentation.

To the extent available, any industry and market data contained in this presentation has come from official or third-party sources. Third party industry publications, studies and surveys generally state that the data contained therein have been obtained from sources believed to be reliable, but that there is no guarantee of the accuracy or completeness of such data. In addition, certain of the industry and market data contained in this presentation may come from the Company's own internal research and estimates based on the knowledge and experience of the Company's management in the market in which the Company operates. While the Company believes that such research and estimates are reasonable and reliable, they, and their underlying methodology and assumptions, have not been verified by any independent source for accuracy or completeness and are subject to change without notice. Accordingly, undue reliance should not be placed on any of the industry or market data contained in this presentation.

The presentation has been prepared using information available to the Company at the time of preparation of the presentation. External or other factors may have impacted on the business of the Company and the content of this presentation, since its preparation. In addition all relevant information about the Company may not be included in this presentation. The information in this presentation has not been independently verified.

This presentation contains forward-looking statements, which include all statements other than statements of historical facts, including, without limitation, any statements preceded by, followed by or including the words "targets", "believes", "expects", "aims", "intends", "may", "anticipates", "would", "could" or similar expressions or the negative thereof. Such forward-looking statements involve known and unknown risks, uncertainties and other important factors beyond the Company's control that could cause the Company's actual results, performance or achievements to be materially different from future results, performance or achievements expressed or implied by such forward-looking statements. Such forward-looking statements are based on numerous assumptions regarding the Company's present and future business strategies and the environment in which it will operate in the future. These forward-looking statements speak only as of the date of this presentation. The Company expressly disclaims any obligation or undertaking to disseminate any updates or revisions to any forward-looking statements contained herein to reflect any change in its expectations with regard thereto or any change in events, conditions or circumstances on which any of such statements are based.

Individual figures (including percentages) appearing in this presentation have been rounded according to standard business practice. Figures rounded in this manner may not necessarily add up to the totals contained in a given table. However, actual values, and not the figures rounded according to standard business practice, were used in calculating the percentages indicated in the text.

Industry Overview

Global steel, iron ore and coking coal markets

Global finished steel consumption is expected to increase by around 5% y-o-y in 2021, driven by economic recovery (supported by the easing of COVID-19 lockdown restrictions and increasing vaccination rates) outside of China.

At the same time, Chinese governmental authorities capped 2021 steel output at 2020 levels in order to curb the industry's CO₂ emissions and energy consumption. The tightening of controls over production levels in the country since 3Q 2021 and negative sentiment in the Chinese construction sector resulted in a global steel and iron ore price correction.

Nonetheless, benchmark prices rose in y-o-y terms:

- the hot-rolled coil (HRC) FOB Black Sea benchmark surged by 103% y-o-y to US\$893/t in 9M 2021
- the 62% Fe iron ore fines CFR China benchmark increased by 76% y-o-y to US\$178/t in 9M 2021

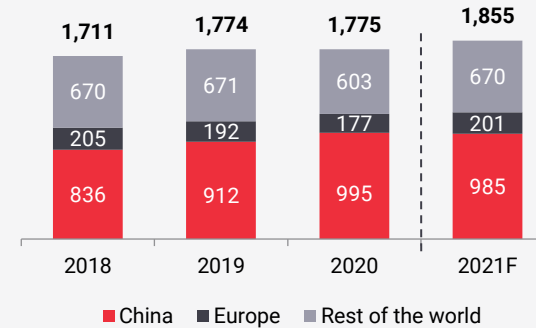

A greater environmental focus supported an increase in pellet premiums globally. For example, the European premium soared by 110% y-o-y to US\$62/t in 9M 2021.

The hard coking coal spot price grew by 36% y-o-y to US\$175/t in 9M 2021, as the seaborne market has been rebalancing amid:

- Chinese import restrictions on Australian coking coal introduced in 2H 2020
- greater seaborne coal demand in India
- issues with supply from Mongolia

5. Premium LV, FOB Australia.

Macro and steel industry in Ukraine

Since 2020, the Ukrainian economy has been affected by a decrease in industrial output, a weak grain harvest and lockdown measures introduced to contain the pandemic. Overall, real GDP contracted by 4.0% y-o-y in 2020 and 2.2% y-o-y in 1Q 2021.

The easing of restrictive measures and a favourable environment on external markets led real GDP to grow by 5.7% y-o-y in 2Q 2021 and by 2.4% y-o-y in 3Q 2021.

The National Bank of Ukraine (NBU) continued to follow an interest rate policy of inflation targeting and kept the local currency floating.

- The consumer price index (CPI) spiked to 9.0% y-o-y in 9M 2021.
- Inflationary pressure led the NBU to begin monetary tightening, the key rate was gradually rising from 6.0% in early 2021 and reached 8.5% in September.
- The average hryvnia rate against the US dollar depreciated by 3.5% y-o-y to 27.49 in 9M 2021.

In 9M 2021, the Ukrainian steel industry performed well:

- total steel output increased by 6.3% y-o-y
- apparent steel consumption rose by 7.4% y-o-y amid a recovery in construction activity (up 3.2%), machinery output (up 8.7%) and pipe production (up 13.3%)

9M 2021 Highlights

Financial highlights

Total revenues increased by 78% y-o-y to US\$13,562 mn:

- External revenues of each segment rose by 78% y-o-y
- Segmental shares of total revenues remained flat y-o-y

Adjusted EBITDA¹ quadrupled y-o-y to US\$6,102 mn:

- Metallurgical EBITDA rose by 5.6x to US\$2,781 mn
- Mining EBITDA grew by 3.9x to US\$3,763 mn

The consolidated EBITDA margin rose by 27 pp y-o-y to 45%:

- Metallurgical EBITDA margin climbed by 18 pp to 26%
- Mining EBITDA margin increased by 35 pp to 77%

CAPEX increased by 79% y-o-y to US\$822 mn:

- Maintenance and strategic investments rose by 67% and 23%, respectively
- Acquisition of steel production facilities in Kamianske, Ukraine, for US\$120 mn²

Free cash flow³ reached US\$3,522 mn in 9M 2021, amid strong profitability and its decent conversion to operating cash flow.

Net debt⁴ to LTM EBITDA was effectively nil as of 30 September 2021, down 1.0x y-t-d, driven by the deleveraging of some US\$1.2 bn, strong EBITDA generation and a higher cash balance.

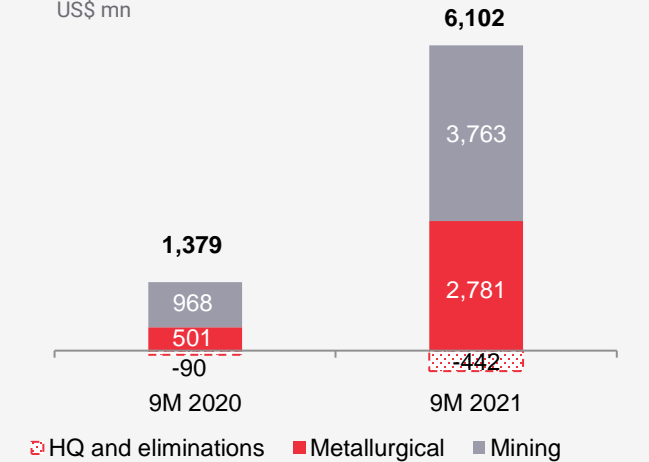

Revenues

US\$ mn

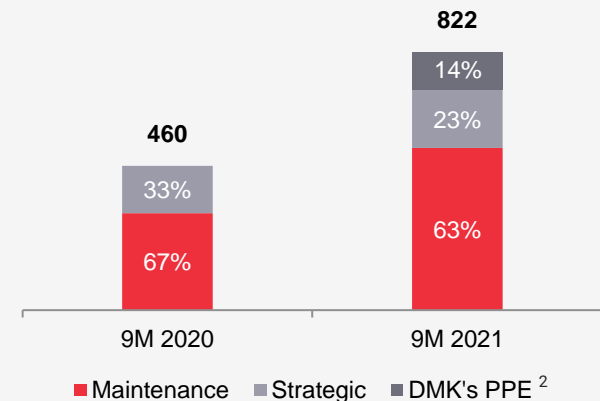

EBITDA

US\$ mn

CAPEX

US\$ mn

Free cash flow

US\$ mn

1. Adjusted EBITDA is calculated as earnings before income tax, finance income and costs, depreciation and amortisation, impairment of property, plant and equipment, foreign-exchange gains and losses, the share of results of associates and other expenses that the management considers non-core plus the share of EBITDA of joint ventures. Adjusted EBITDA will be referred to as EBITDA in this presentation.

2. In August 2021, Metinvest acquired assets relating to the integral property complex of PJSC Dneprovsky Iron & Steel Works (DMK) in Kamianske, Ukraine, for around US\$340 mn, of which the property, plant and equipment (PPE) cost was US\$120 mn.

3. Free cash flow is calculated as net cash from operating activities less net cash used in investing activities.

4. Net debt is calculated as total debt less cash and cash equivalents.

Because of rounding, numbers presented in this presentation may not add up precisely to the totals provided and percentages may not precisely reflect absolute figures.

Sales portfolio

Metallurgical sales

- Up 78% y-o-y, mainly attributable to higher average selling prices for steel products in line with global benchmarks, greater shipments of finished steel products (up 9%) as a result of demand recovery in several strategic markets for the Group, and recent investments at the Mariupol steelmakers
- Distribution highlights:
 - higher share of Europe (up 11 pp), due to ongoing demand recovery in the region
 - practically no shipments to Asia due to a redirection of volumes to higher-margin markets

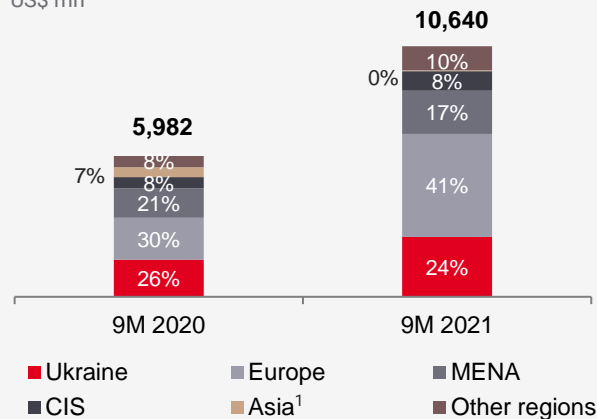

Mining sales

- Up 78% y-o-y, amid higher iron ore selling prices and pellet premiums globally, as well as greater pellet shipments (up 28%)
- Distribution highlights:
 - demand recovery in Europe boosted the region's share to 28% (up 11 pp)
 - Ukraine's share totalled 33% (down 1 pp), following increased intragroup consumption
 - the share of Asia fell to 30% (down 15 pp), following a 52% drop in shipments to China
 - the share of other regions reached 9% (up 5 pp) primary amid greater iron ore sales to MENA

Sales in hard currencies (US\$, US\$-linked, EUR and GBP) accounted for 83% in 9M 2021 (up 1 pp)

Metallurgical sales by region

- Iron ore concentrate.
- Excluding railway products.

Total sales by currency in 9M 2021

US\$ mn

EBITDA

EBITDA reached US\$6,102 mn in 9M 2021, mainly driven by:

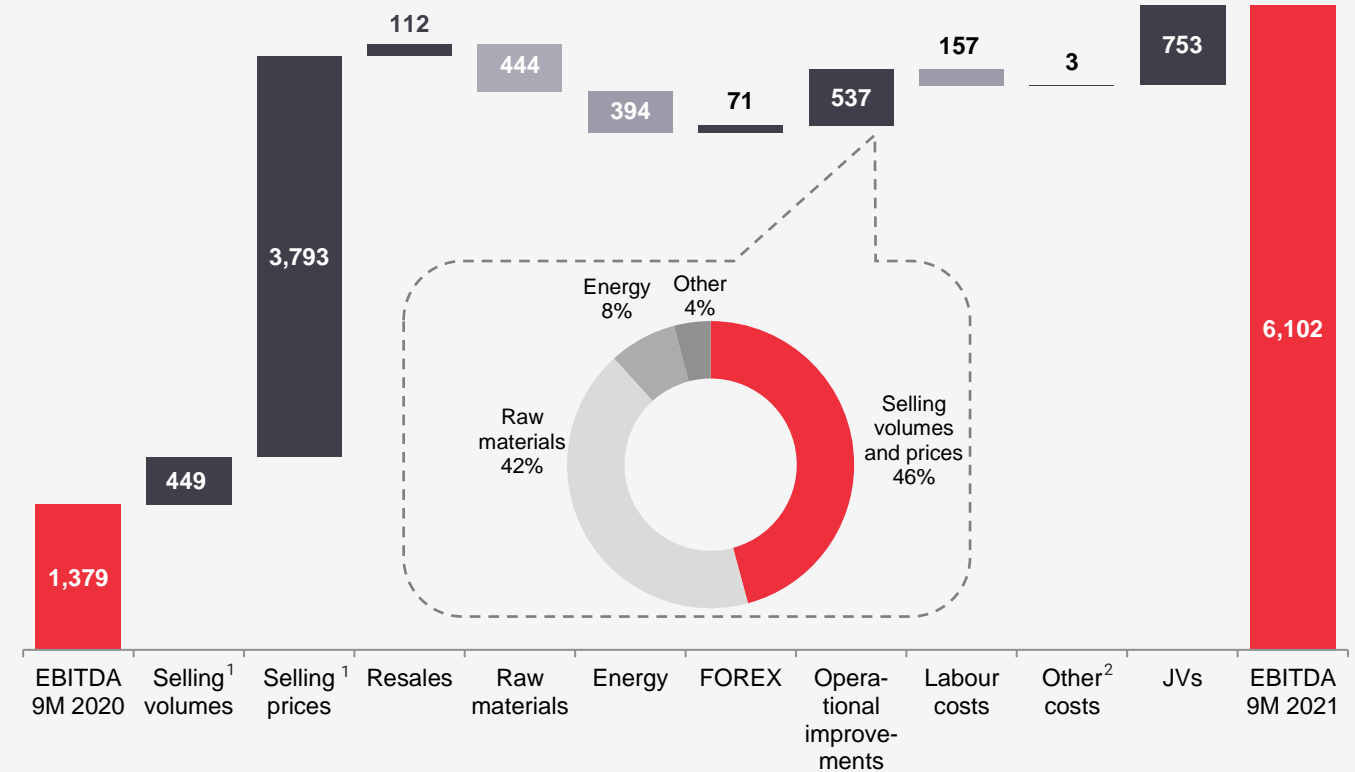

- higher sales prices for steel and iron ore products, which also improved the contribution of both joint ventures and earnings from resales
- the positive effect from operational improvements, mainly through optimised consumption of raw and energy materials, increased productivity of key production equipment and enhanced sales efficiency
- greater sales volumes of in-house finished steel products and pellets
- hryvnia depreciation of 3.5% y-o-y against the US dollar

The negative impact on EBITDA was primarily due to:

- growth in spending on raw materials mainly due to their inflated market prices, greater consumption by Mariupol steelmakers amid higher production levels, the integration of steelmaking facilities in Kamianske, as well as increased purchases of semi-finished products for further processing at the Group's plants, partly compensated by improved self-sufficiency in coking coal following the consolidation of Pokrovske Coal in March 2021
- higher expenses on energy materials, mainly due to increased natural gas prices (up 2.4x) and electricity tariffs (+11% y-o-y)
- greater labour costs due to recent M&A and a pay rise of up to 25% for production and administrative personnel at Ukrainian assets in May and September 2021, respectively

EBITDA drivers

US\$ mn

1. Net of resales.

2. Other costs include fixed costs (excl. labour costs) and other expenses; net of resales.

Cash flow

Operating cash flow:

- US\$4,520 mn in 9M 2021, up 3.8x y-o-y
- conversion of EBITDA to operating cash flow was 74% in 9M 2021 (86% in 9M 2020)
- working capital release of US\$261 mn, primarily attributable to an increase in trade payables on resales amid increased iron ore and steel prices
- corporate income tax (CIT) rose by 9.2x y-o-y to US\$616 mn

Investing cash flow:

- purchases of property, plant and equipment (PPE) and intangible assets (IA) totalled US\$662 mn, up 31% y-o-y
- US\$455 mn paid under the guarantee issued in exchange for the option to purchase the remaining 75.22% in Pokrovske Coal
- US\$340 mn paid for assets relating to the integral property complex of DMK
- US\$445 mn of dividends received from the Mining JV

Financing cash outflow, driven by:

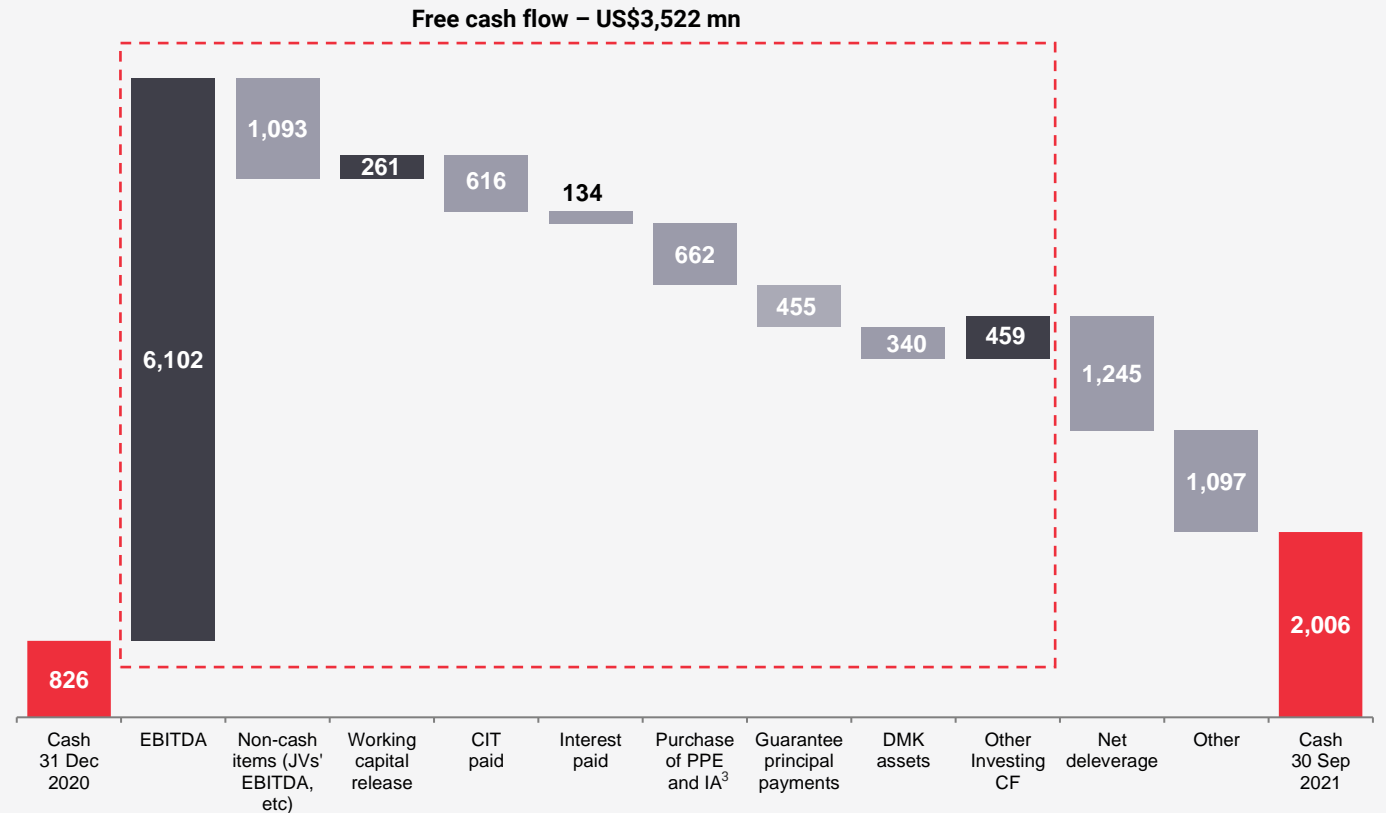

- US\$1,245 mn of net repayments of loans, borrowings and trade finance facilities

Free cash flow² reached US\$3,522 mn in 9M 2021, up 6.1x y-o-y.

The cash balance rose by 2.4x y-t-d to US\$2,006 mn as of 30 September 2021.

Cash flow in 9M 2021

US\$ mn

1. Pokrovske Coal was consolidated in March 2021 and comprises several entities, the most significant of which are Pokrovske Colliery and Sviato-Varvarynska Beneficiation Factory.
 2. Free cash flow is calculated as net cash from operating activities less net cash used in investing activities.
 3. Excluding the acquisition of steel production facilities in Kamianske.

Capital expenditure

In 9M 2021, CAPEX increased by 79% y-o-y to US\$822 mn

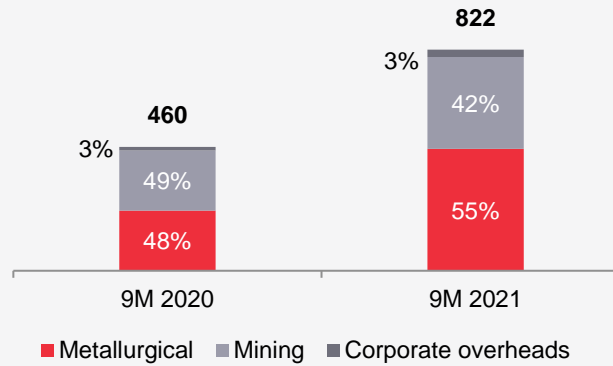

- Maintenance CAPEX rose by 67% y-o-y
- Investments in strategic projects grew by 23% y-o-y
- Metinvest (via Dnipro Coke) acquired DMK's PPE for US\$120 mn in August 2021¹

2021 CAPEX priorities

- Review of the technological strategy
- Progress on strategic initiatives (for more details, please see slide 12)
- Focus on environmental agenda (for more details, please see slides 12 and 15)
- Conduct maintenance
- Develop design for projects in the pipeline

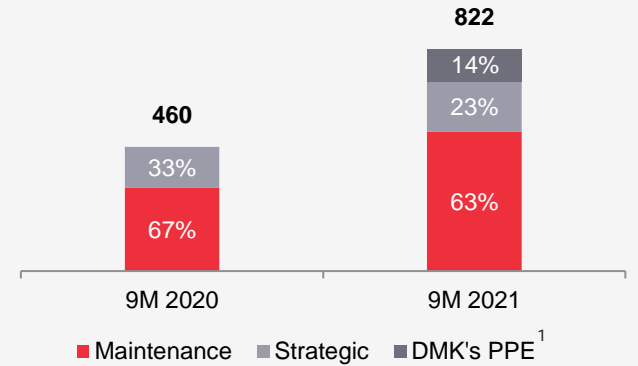

CAPEX by segment

US\$ mn

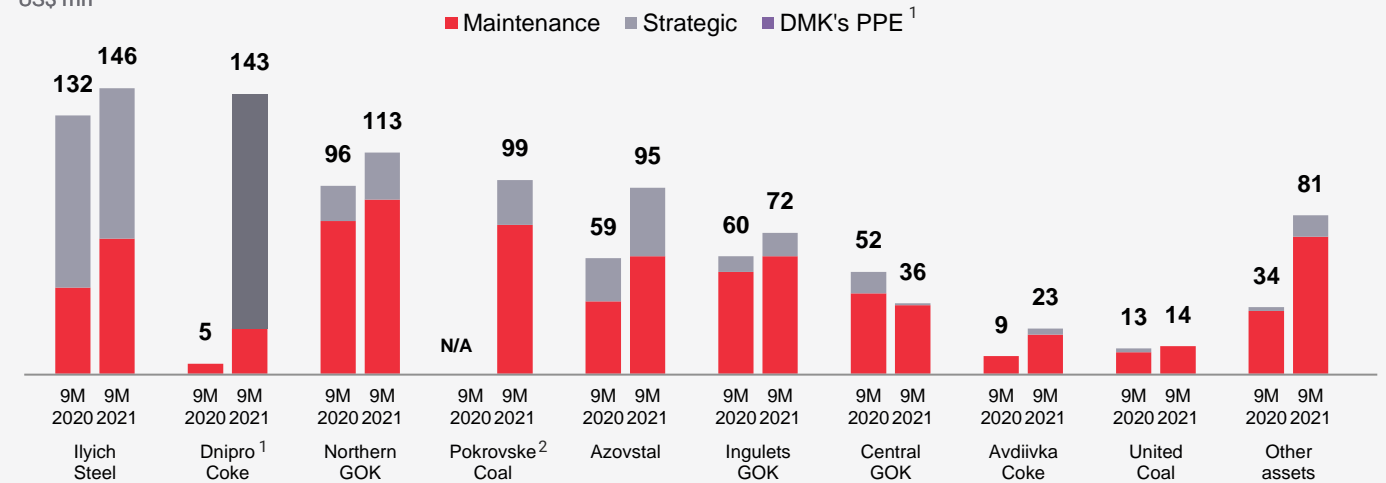

CAPEX by purpose

US\$ mn

CAPEX by key asset

US\$ mn

1. In August 2021, Dnipro Coke acquired assets relating to the integral property complex of DMK for US\$340 mn, of which PPE cost was US\$120 mn.
 2. Pokrovske Coal has been consolidated since March 2021.

Key strategic CAPEX projects in 2021

No	Project	Asset	Description	Status
1	New cold-rolled, galvanised and colour-coated coil production facility	Ilyich Steel	Improve quality of cold-rolled and galvanised products, diversify product mix with new colour-coated products, replace imported products on local market. Overall production volumes will reach about 1.2 mt/y (after the completion of the project's first phase).	A contract with Italian steel equipment supplier Danieli Group has been signed. Basic engineering development and tender-related procedures have started. The project's first phase is currently expected to be completed by the end of 2024.
2	Construction of air separation units	Ilyich Steel	Increase production of oxygen and nitrogen required for steel production.	Around 85% of core equipment has been supplied, and the installation of technical premises and structures is ongoing. Commissioning is expected in 1Q 2022.
3	Sinter plant modernisation	Ilyich Steel	Comply with environmental requirements.	Construction of the complex for the two-stage gas cleaning system of sintering and cooling zones for all 12 sintering machines has been completed. Auxiliary works are being finalised.
4	Upgrade with new construction of gas cleaning facilities for the casthouses and stockhouses of blast furnaces (BFs) nos. 4 and 5	Ilyich Steel	Comply with environmental requirements.	The project at BF no. 5 was completed in 2Q 2021. For BF no. 4, construction and installation works are in progress.
5	Modernisation of gas cleaning equipment for basic oxygen furnaces (BOF)	Azovstal	Comply with environmental requirements.	Shipments of the main equipment and preparatory works for construction are ongoing. The upgrade is currently expected to be completed in 3Q 2022 for BOF no. 1 and 1Q 2023 for BOF no. 2.
6	Installation of a new plasma cutting line	Metinvest Tramet	Increase the cutting capacity by 170 kt/y of plates with a thickness from 4 mm to 40 mm.	The installation was completed in November 2021.
7	Construction of crusher and conveyor system	Ingulets GOK	Reduce operational and capital expenditure in iron ore mining and maintain production volumes.	The Eastern conveyor line was launched in August 2021.
8	Construction of crusher and conveyor system at Pervomaisky open-pit mine	Northern GOK	Reduce operational and capital expenditure in iron ore mining and maintain production volumes.	The system for rock transportation was launched in September 2021. Final auxiliary infrastructure works are in progress.
9	Replacement of gas cleaning units in Lurgi 552-A roasting machine	Northern GOK	Comply with environmental requirements and improve workplace conditions.	Active construction work is ongoing. Completion is expected in 1Q 2022.
10	Thickening of beneficiation waste	Northern GOK	Reduce waste transportation costs, decrease investments in maintenance of pumping equipment at slurry pumping stations.	Development of detailed engineering is ongoing, and preparatory work has started. Completion is expected in 2023.
11	New mine block no. 11	Pokrovske Coal	Maintain production volumes.	Active construction works are progressing.

Debt profile

As of 30 September 2021:

- total debt was US\$2,245 mn, down 24% y-t-d
- net debt was US\$239 mn, down 89% y-t-d
- net debt to LTM EBITDA was 0.0x, down 1.0x y-t-d
- share of public bonds stood at 84% of total debt
- virtually no debt is contractually due in 2021-22

CREDIT RATINGS

Moody's

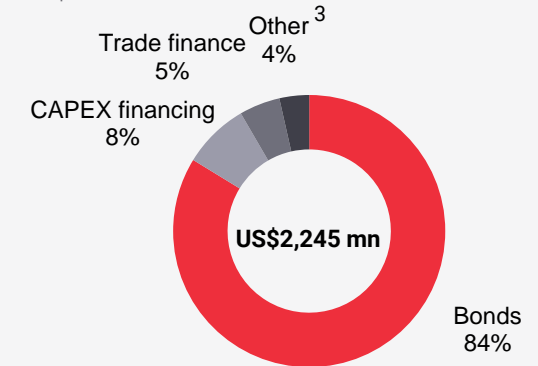

Total and net debt

US\$ mn

Total debt as of 30 September 2021

US\$ mn

Corporate debt maturity as of 30 September 2021⁴

US\$ mn

1. Total debt is calculated as the sum of bank loans, non-bank borrowings, bonds, trade finance and lease liabilities.

2. Net debt is calculated as total debt less cash and cash equivalents.

3. Lease liability under IFRS 16, debt resulting from the consolidation of Pokrovske Coal in March 2021 and other bank loans.

4. Notes:

• Presented amounts of scheduled installments include principal only (without accrued interest, fees, commissions and discounts)

• Bonds: US\$176 mn at 7.75% pa due in 2023, EUR300 mn at 5.625% pa due in 2025 (converted at EUR/USD f/x of 1.1658),

US\$505 mn at 8.50% pa due in 2026, US\$333 mn at 7.65% pa due in 2027, US\$500 mn at 7.75% pa due in 2029

• Trade finance lines are mainly rollovers, so are excluded from the maturity profile chart; Lease liability under IFRS 16 is excluded

Deleveraging

Total deleveraging exceeded US\$1.2 bn in 9M 2021, amid the Group's strong financial performance.

Metinvest sought to improve its debt portfolio quality during the reporting period

- Both debt facilities of Pokrovske Coal were restructured – the interest rates were significantly decreased in line with newly agreed repayment schedules. Given an early repayment option, most of the debt was repaid ahead of schedule
- Metinvest repurchased US\$277 mn of its bonds (US\$135 mn of bonds due in 2023 and US\$142 mn of bonds due in 2026) and promptly cancelled them afterwards
- The PXF facility has been prepaid in full
- Repayments were made on several other bank loans and lease liabilities
- Use of trade finance has been reduced

Total debt decrease in 9M 2021

Segmental Review

Mining operations

Overall iron ore concentrate output grew by 4% y-o-y, as a result of the Group's greater ore production and operational improvements.

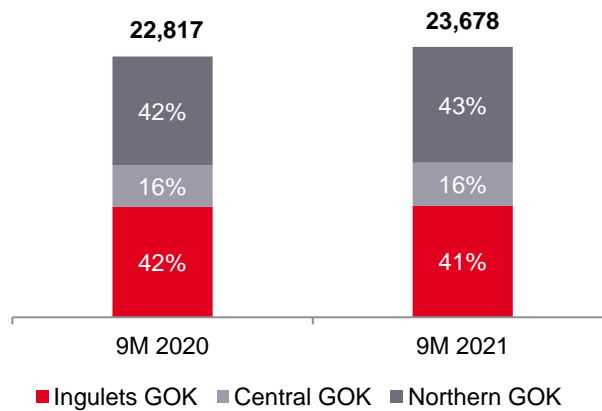

Each iron ore producer boosted output of iron ore concentrate in 9M 2021:

- up 7% y-o-y at Northern GOK
- up 3% y-o-y at Central GOK
- up 1% y-o-y at Ingulets GOK

Iron ore self-sufficiency was around 225%¹ in 9M 2021.

Iron ore concentrate production

kt

1. Iron ore self-sufficiency is calculated as actual iron ore concentrate production divided by actual consumption of iron ore products to produce hot metal at the Group's steelmakers.

Merchant iron ore concentrate² output fell by 19% y-o-y, as a result of higher intragroup consumption, the acquisition of steel production facilities in Kamianske and a larger order book for pellets.

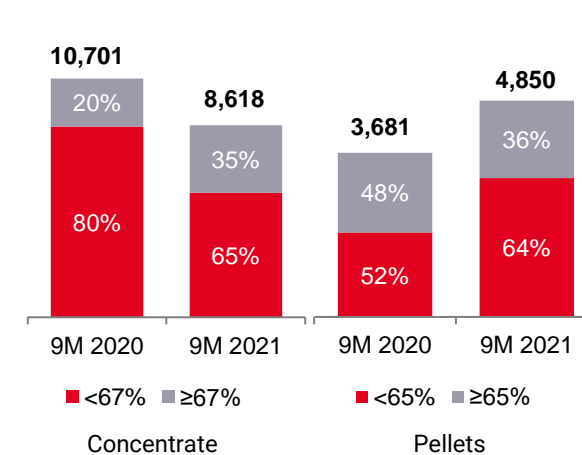

- The share of high-grade concentrate reached 35%, up 15 pp.

Merchant pellet² output surged by 32% y-o-y:

- The share of high-grade pellets was 36%, down 12 pp, as a result of a change in the order portfolio in favour of pellets with a lower Fe content.
- Output of pellets with a 67.5% Fe content totalled 703 kt in 9M 2021.

Output of iron ore products by Fe %

kt

2. Merchant iron ore product output figures exclude intragroup sales and consumption. The production figures for merchant iron ore concentrate in 1Q 2020 were revised to exclude sales between the mining assets to produce pellets.

3. Excluding production from raw coal purchased from third parties

Overall coking coal concentrate output³ climbed by 80% y-o-y, driven by:

- the consolidation of Pokrovske Coal⁴ from March 2021 (effect of 1,800 kt)
- practically unchanged output y-o-y at United Coal

In September 2021, Metinvest created the Coal Directorate to manage coking coal assets.

Coking coal self-sufficiency totalled 70%⁵ in 9M 2021, following the acquisition of steel production facilities in Kamianske.

Coking coal production

kt

4. Pokrovske Coal comprises several entities, the most significant of which are Pokrovske Colliery and Sviato-Varvarynska Beneficiation Factory.

5. Coal self-sufficiency is calculated as actual coal concentrate production divided by actual consumption of coal concentrate to produce coke required for production of hot metal at the Group's steelmakers and coal consumption for PCI is included in the calculation.

Mining segment financials

Sales

- External sales increased by 78% y-o-y, mainly driven by higher prices, as well as 28% growth in pellet deliveries.
- The share of pellets in the iron ore sales mix volumes increased to 36% in 9M 2021 (up 10 pp y-o-y), amid higher demand and premiums globally, while that of merchant concentrate decreased to 64% from 74%.
- The top 5 customers of the segment accounted for 46% of segmental sales (49% in 9M 2020).
- Overall, 59% of iron ore volumes were sold under annual contracts (61% in 9M 2020).

EBITDA

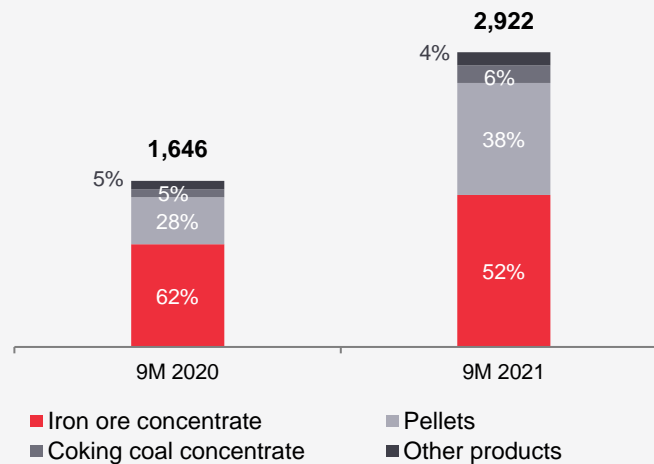

- EBITDA rose by 3.9x y-o-y, mainly amid a higher segmental top line, stronger contribution from the Mining JV, a positive effect from operational improvements, the consolidation of Pokrovske Coal, and the increased profitability of United Coal.
- The contribution to gross EBITDA¹ totalled 58%, down 8 pp y-o-y.
- The EBITDA margin grew by 35 pp y-o-y to 77%.

The segment's CAPEX increased by 53% y-o-y to US\$342 mn, primarily attributable to investments related to Northern GOK, Ingulets GOK and Pokrovske Coal.

US\$ mn	9M 2021	9M 2020	CHANGE
Sales (total)	4,892	2,310	>100%
Sales (external)	2,922	1,646	78%
% of Group total	22%	22%	-
EBITDA	3,763	968	3.9x
% of Group total ¹	58%	66%	-8 pp
Margin	77%	42%	35 pp

1. The contribution is to the gross EBITDA, before adjusting for corporate overheads and eliminations.

Metallurgical operations

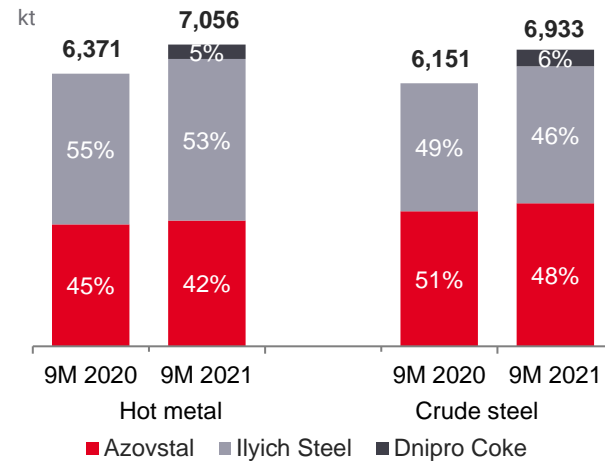

In August, Metinvest (via Dnipro Coke) acquired assets of DMK, once a full-cycle steelmaker in Kamianske, Ukraine, with crude steel production capacity of 3.2 mt/y.

Hot metal output rose by 11% y-o-y, amid:

- the consolidation of the acquired assets
- Ilyich Steel's BF no. 3 and no. 4 were shut down for a scheduled overhaul in 1H 2020
- Azovstal's BF no. 4 was put on standby amid a lower order book in March-May 2020

Crude steel output rose by 13% y-o-y on the back of greater hot metal production.

Hot metal and crude steel production

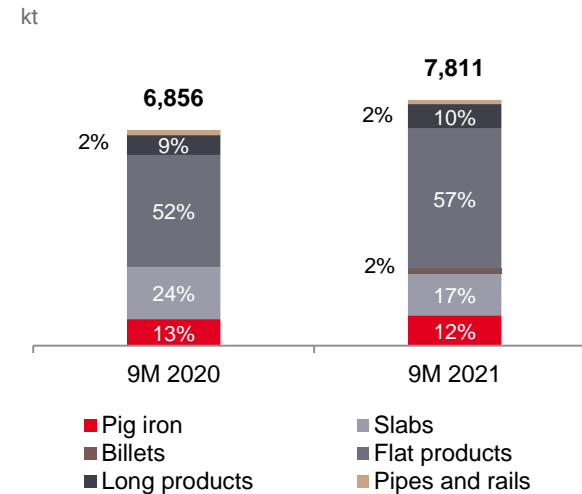

Share of finished steel products reached 69% of the product mix, up 6 pp y-o-y, as a result of a:

- 24% y-o-y increase in flat product output, amid improved productivity of hot strip mill 1700 and the four-stand mill at Ilyich Steel, as well as growth in plate orders at Azovstal
- 26% y-o-y rise in long product output, amid a greater order portfolio at Promet Steel and the acquisition of production facilities in Kamianske
- 19% y-o-y decrease in merchant slab production, primarily due to their allocation to flat product rolling

Billet output totalled 165 kt in 9M 2021 following the acquisition of production assets in Kamianske

Merchant pig iron and steel product output

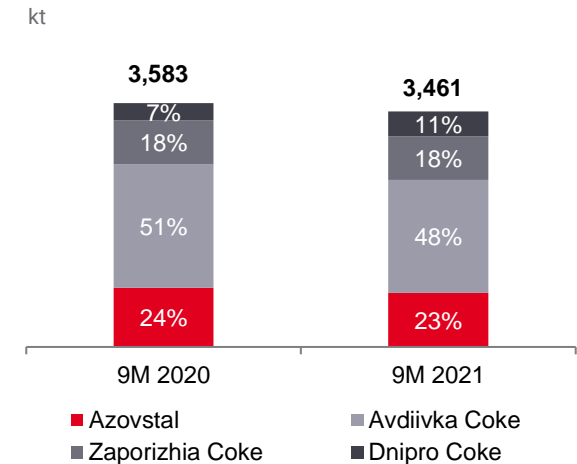

Coke¹ output fell by 3% y-o-y, driven by:

- decreases in production at Avdiivka Coke (down 156 kt) and Azovstal (down 76 kt) amid a shortage of raw materials
- the effect of the consolidation of Dnipro Coke's production since April 2020 (112 kt)

Coke self-sufficiency was around 110%² in 9M 2021.

Coke production

1. Dry blast furnace coke output. Starting in 2Q 2020, coke production data include production volumes of Dnipro Coke after the Group increased its stake in the asset to 73.01%.

2. Coke self-sufficiency is calculated as actual coke production divided by actual consumption of coke to produce hot metal in the Metallurgical segment.

Metallurgical segment financials

Sales

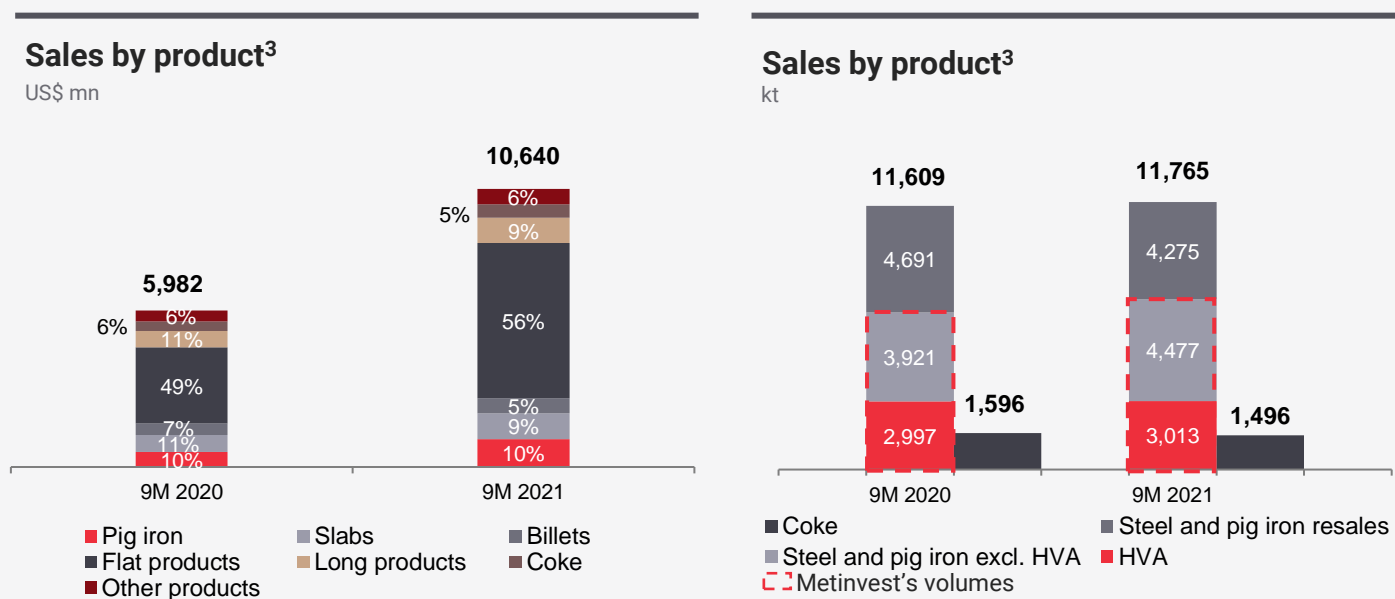

- External sales rose by 78% y-o-y, mainly due to increased prices of all steel products in line with global benchmarks, as well as greater shipments of finished products (up 9%).
- The share of HVA products¹ in the sales mix volumes, excluding resales, was 40% in 9M 2021, down 3 pp y-o-y.
- The top 5 customers accounted for 15% of segmental revenues, down 1 pp y-o-y.
- Almost all steel volumes were sold on the spot market.

EBITDA

- EBITDA increased by 5.6x y-o-y to US\$2,781 mn, driven primarily by a higher segmental top line, greater contribution from the Metallurgical JV and the positive effect from operational improvements.
- The contribution to gross EBITDA² reached 42%, up 8 pp y-o-y.
- The EBITDA margin rose by 18 pp y-o-y to 26%.

Segmental CAPEX doubled y-o-y to US\$452 mn, mainly due to greater investments at Ilyich Steel, Azovstal and Avdiivka Coke, as well as the acquisition of DMK's production assets.

US\$ mn	9M 2021	9M 2020	CHANGE
Sales (total)	10,726	6,034	78%
Sales (external)	10,640	5,982	78%
% of Group total	78%	78%	--
EBITDA	2,781	501	5.6x
% of Group total ¹	42%	34%	8 pp
Margin	26%	8%	18 pp
CAPEX	452	223	>100%

1. HVA products include thick plates, cold-rolled flat products, hot-dip galvanised sheets and coils, structural sections, rails and pipes.
 2. The contribution is to the gross EBITDA, before adjusting for corporate overheads and eliminations.
 3. Starting 2020, revenues from sales of square billets and other products and services have been revised to include round billets into billets.
