

Steel sailing over the waves

The largest sailing ship in the world was constructed of Metinvest steel at Croatian shipyard Brodosplit

This luxury passenger vessel is a replica of an old merchant ship, considered by shipbuilders to be among the most elegant and beautiful. The shipbuilders tell us about how the Flying Clipper was created – from scratch to launch.

Dreams of Sailing: how Ukrainian steel helped to make a dream come true: by being used to build the largest sailing ship in the world
